

Adhesive gel for fingertips

# Finger Particle remover

## Check Point

Part Number: FPR-30

### Structure that fits fingertips!

The soft gel fits fingertips and removes dust due to the structure with a hollow inside.

### No need to worry about Transcription!

There is no need to worry about transcription of silicone and plasticizer because we don't use them.

### Easy to clean!

It is possible to use repeatedly by washing a dirt with water or special cleaner.

## The comparison before and after use

It confirmed that how much dirt was transferred to the gel before and after holding Finger Particle remover.

Hold the gel with dirt fingertips.

Dirt is transferred to the gel **firmly!**

## Used image

It is possible to install on the desk, vertical and upper surface because Finger Particle remover is installed with an adhesion of gel. And it can be used without obstructed your work.

**\* It is most popular to use in clean room purpose.**
